

WOODED WETLAND ESTABLISHMENT

Use this wetland seed mix in partially shaded riparian corridors and saturated, newly reforested areas to reduce weed competition and stabilize soil. As the tree canopy fills in, some of the species in this seed mix will establish a permanent herbaceous understory layer and help to fill out the maturing wooded wetland. This seed mix includes at least 12 of 16 native permanent grass and sedge species and 17 of 22 native forb and shrub species. Apply at 37.13 PLS pounds per acre.
